Mr. R. F. Gasaway
Aircro Chemicals and Plastics
P. O. Box 36
Elkton, Maryland 21921

Dear Mr. Gasaway:

Thank you very much for the courtesies extended to Mr. Moore and myself by you and Mr. Kilcullen during our visit to your industrial installation. The visit was very informative and your description of the waste disposal procedures employed at the plant was excellent.

I am glad that you were able to reach an agreement with the town authorities concerning the disposal of the wastewater through the community sanitary system. As you indicated your desires of obtaining a Certificate of Approval to use an alternate disposal area in the event that unforeseen circumstances preclude the discharge of the wastewater into the sanitary system, I am enclosing a copy of our Regulation 4.7 which contains the data required by the Department before the issuance of the Certificate of Approval. As soon as the information is received and evaluated by the Department a decision concerning the proposal will be made.

Because the alternate proposal involves the use of a sand pit for the disposal of the wastes a copy of this letter is being forwarded to the Maryland State Department of Health, Division of Solid Wastes, for their consideration.

If we can be of further assistance in the matter please feel free to call on us.

Very truly yours,

E. Acevedo
